

León Castillo

7th Semester Civil Informatics Engineering student and tutor at Universidad de La Frontera

AGE

24 years old

OCCUPATION

Undergraduate student at
Universidad de La Frontera.

LOCATION

Temuco, Chile

MARITAL STATUS / FAMILY

Single

TECHNOLOGICAL LEVEL

High

SHORT BIO

León Castillo, 24 years old, single and lives in Temuco. Studying his seventh semester of civil informatics engineering and is up to date in his curriculum, likes to go to talks and conferences, as well as tutoring for initial informatics subjects

OBJECTIVES

- Help his lower-level classmates to pass their subjects
- Get classmates to lose their fear of asking for academic help
- Focus his tutoring on subjects and topics that are causing problems

FRUSTRATIONS / PAIN POINTS

- His tutees ask for help at the end of the semester when it is already too late
- The stigma of the at-risk situation makes first-year students isolate themselves and stop attending tutoring
- Difficulty in offering help without invading privacy or making classmates with visibly poor performance feel exposed

MOTIVATIONS

- Empathy for new students, as he understands how difficult it is to adapt to university life
- Vocation to teach, share his knowledge and his interests
- Reinforce his own basic knowledge by teaching it

NEEDS

- A way to reach students who need his tutoring
- Information about subjects with more difficulty to adapt his tutoring

BEHAVIORS

- Disciplined, is up to date with his subjects and uses his free time to prepare study material.
- Actively participates in study areas helping others

CHANNELS AND TOOLS HE USES

- Email, Discord, Campus, Google, intranet, Github.

DEVICES

- Apple phone, Macbook.

"I like it when freshmen pass their first subjects, but it makes me angry that they fail without even asking for help when they need it"
