

# Dual-Track Journey Map

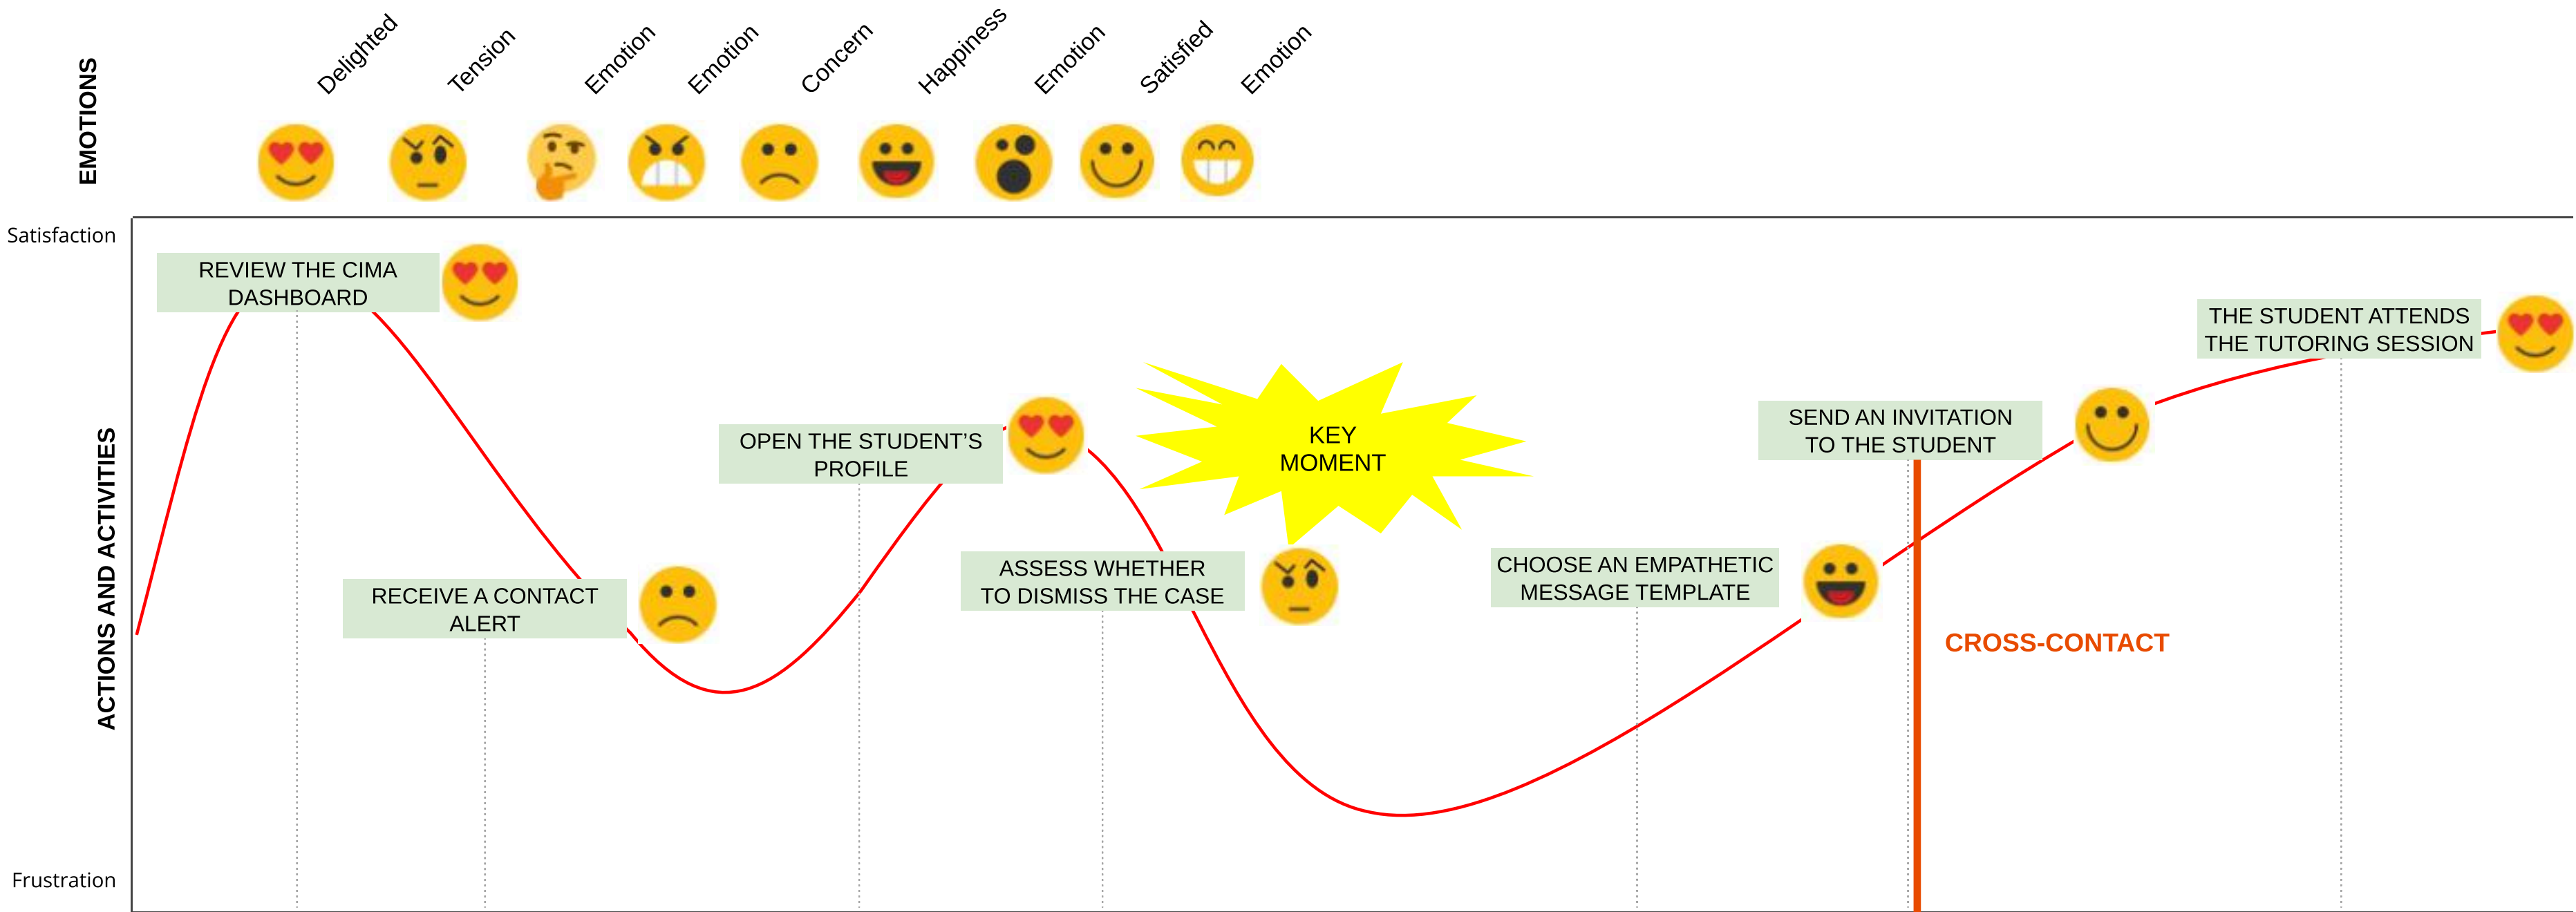

To understand the complete experience a user has with the product.

What touchpoints does a user experience?

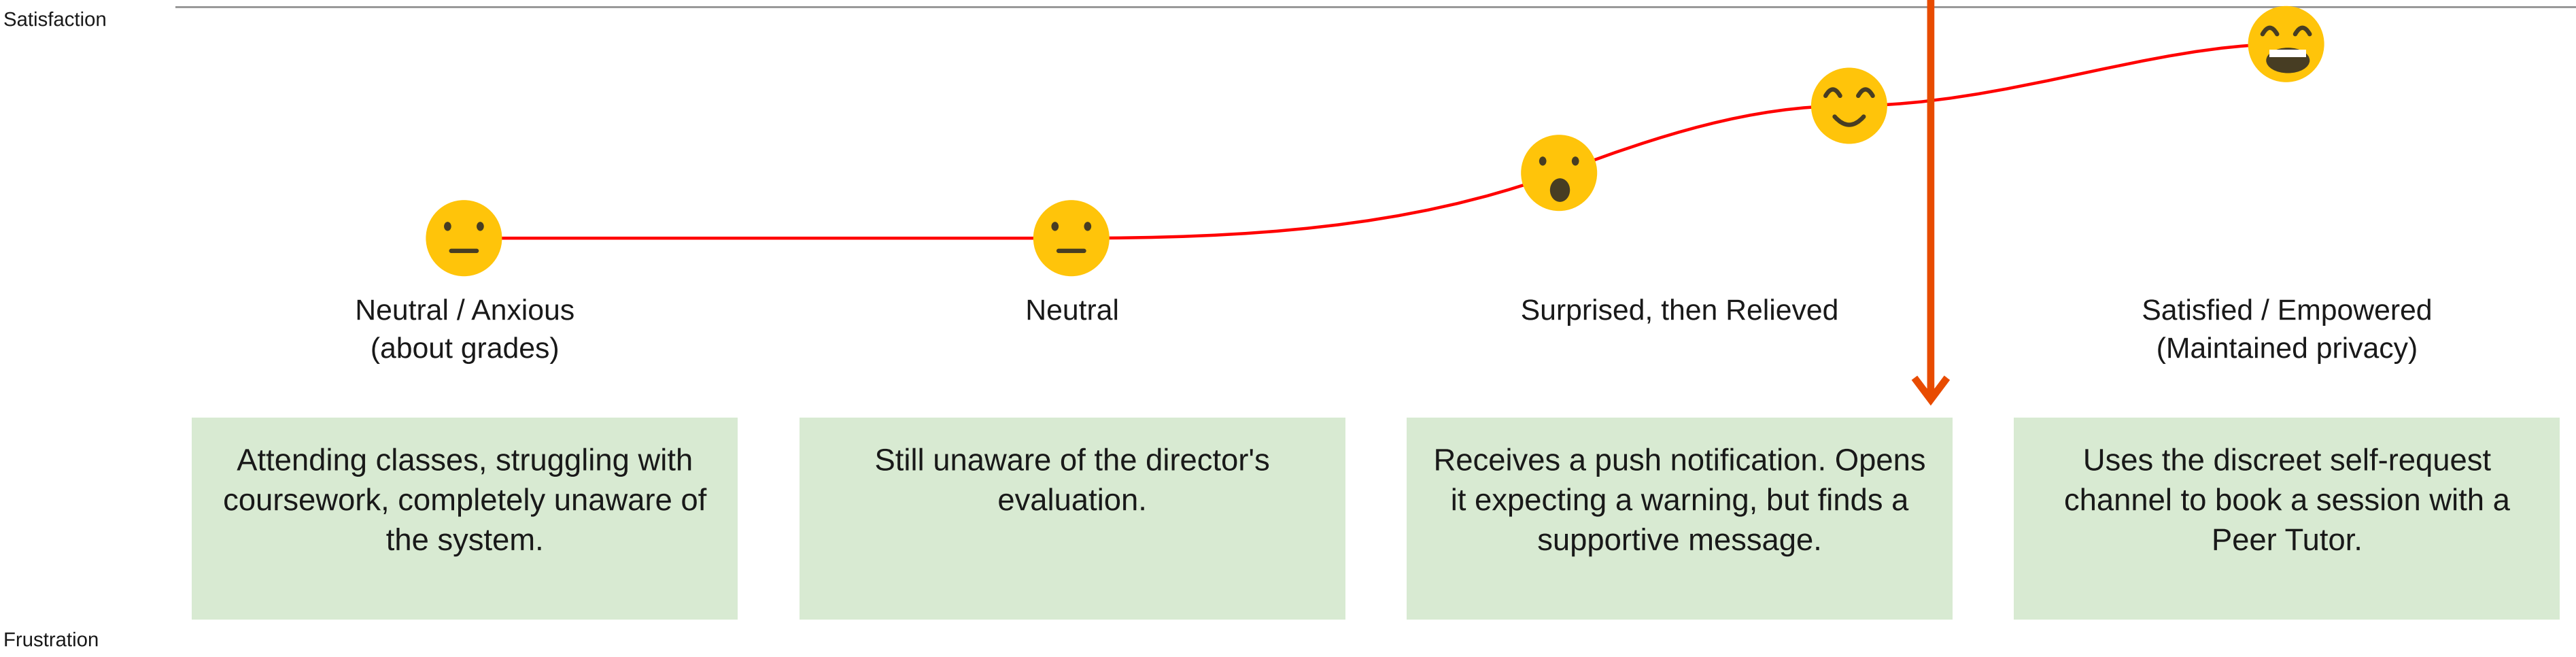

### INSTRUCTIONS:

1. Name each touchpoint
2. Describe the specific activities at each touchpoint
3. Fill in each quadrant for every touchpoint
4. Draw an emotional journey curve
5. Describe the emotions the user experiences at each touchpoint

### Claudio's Track (Academic Director)

### José's Track (First-Year Student)

|               | RISK DETECTION                                                                                                                                                                                                    | CASE ASSESSMENT                                                                                                  | EMPATHETIC OUTREACH                                                                                    | FOLLOW-UP SUPPORT                                                                                   |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| VALUE         | <div><div>What value do users expect?<br/>What value does the product or service offer users?</div><div>Identify at-risk students before they fail or drop out of the program.</div></div>                        | <div><div>Gain clear, well-founded context without relying on stigmatizing traffic-light indicators.</div></div> | <div><div>Establish a warm line of communication, free of a punitive or disciplinary tone.</div></div> | <div><div>Ensure effective follow-up (close the loop) in coordination with tutors.</div></div>      |
| BARRIERS      | <div><div>What value do users expect?<br/>What value does the product or service offer users?</div><div>Too much daily information or false positives from the system.</div></div>                                | <div><div>Fear of judging a student based on an opaque or quantitative algorithm.</div></div>                    | <div><div>Lack of time to write personalized messages, and student discomfort.</div></div>             | <div><div>A disconnect between program leadership and peer tutors.</div></div>                      |
| OPPORTUNITIES | <div><div>What VALUE do users expect?<br/>What value does the product or service offer users?</div><div>Filtered contact suggestions with qualitative explanations ("3 weeks of declining activity").</div></div> | <div><div>An option to dismiss the suggestion with one click to continuously train the model.</div></div>        | <div><div>Ready-made templates that let students choose their own time slot.</div></div>               | <div><div>An internal referral process that goes straight to the peer tutor's calendar.</div></div> |
