Evaluation Dimensions

Common criteria used for all three platforms

General UX	Domain-specific
Identification, users and value	Algorithmic uncertainty
Features and reference flow	Communication tone and stigma
Navigation and visual design	Confidentiality and help requests
Observable accessibility	Role boundaries and follow-up

Direct competitor: Civitas Learning

Identification

NAME

Civitas Learning

PLATFORM

Web / enterprise SaaS

ANALYSIS BASIS

Team research notes · October 2026

Source: civitaslearning.com

Direct competitor: Civitas Learning

Target User Profile

Academic directors, advisors and retention teams

Value Proposition

Predictive analytics to identify student-support needs and coordinate interventions

Main Features

- Student success and retention analytics
- Student context and trends
- Outreach and advising coordination

Direct competitor: Civitas Learning

Communication Tone:
Relational student guidance is treated as transactional support tickets, losing empathy.

Direct competitor: Civitas Learning

Confidentiality: Risk scores and alerts are broadcast across staff dashboards without a private self-request channel for students.

Algorithmic Certainty: Displays explicit numeric persistence probabilities and red badges without reporting margins of error, promoting algorithmic bias.

Direct / analogous competitor: EAB Navigate360

Identification

NAME

EAB Navigate360

PLATFORM

Web / mobile student experience

ANALYSIS BASIS

Team research notes · October 2026

Source: eab.com/solutions/navigate360

Direct / analogous competitor: EAB Navigate360

Target User Profile

Advisors, faculty, institutional teams and students

Value Proposition

Connect early alerts, advising, referrals and student-led help requests

Main Features

- Early alerts and progress monitoring
- Student help requests (Raise Hand)
- Referrals and closed-loop tracking

Direct / analogous competitor: EAB Navigate360

**Communication
Tone & Stigma
[AVOID]:** Gamified leaderboards and public rankings introduce toxic peer pressure and visual stigma into academic wellness.

Direct / analogous competitor: EAB Navigate360

Confidentiality & Help Request

[ADOPT]: The "Raise Hand" feature successfully empowers students to request help discreetly from their mobile devices.

Identification

NAME

Salesforce Education Cloud

PLATFORM

Web / enterprise education CRM

ANALYSIS BASIS

Team research notes · October 2026

Source: salesforce.com/education/

Design reference: Salesforce Education Cloud

Value Proposition

University administrators, advisors and service teams

Target User Profile

Unify records, interactions and case-management workflows

Main Features

- Student 360 views and unified history
- Case and service-request management
- Role-oriented records and permissions

Design reference: Salesforce Education Cloud

Communication
Tone: Frames student challenges as "Cases" and measures "Average Time to Resolve", reducing human mentorship to IT service desk tickets.

Design reference: Salesforce Education Cloud

Algorithmic Certainty: Focuses on factual activity logging and auditable event tracking rather than speculative machine learning calculations.

Design reference: Salesforce Education Cloud

The screenshot displays the Salesforce Education Cloud interface. At the top, there's a navigation bar with the Salesforce logo, a search bar, and various utility icons. Below this is a 'Student Success' header with a 'Home' link and a list of active tabs for different users and records. The main content area is divided into sections. On the left, a 'Person Account' section shows personal details for Sofia Sanders, including gender identity, preferred pronoun, age, email, phone, and application date. Below this is a 'Profile' section with a student photo, name, and contact information. To the right, a 'Life Events' timeline shows milestones from 'STEM Summer Camp' to 'Career'. At the bottom, there's an 'Alerts' section and a footer with various system links.

Confidentiality: Consolidating all academic and personal milestones gives rich context, but creates severe privacy risks if not strictly siloed by role.

Comparative Matrix

Comparative Summary Table									
Alternative Analysis Dimension →	1. Target User Profile	2. Core Value Proposition	3. Navigation Pattern	4. Algorithmic Certainty	5. Communication Tone & Stigma	6. Confidentiality & Help Request	7. Onboarding Flow	8. Visual Design & Semantics	9. Observable Accessibility
Civitas Learning	Academic Directors, Program Leads, Retention Officers.	Predictive risk analytics and AI-assisted retention outreach.	Left sidebar navigation with multi-column data tables and dashboards.	Explicit percentage risk scores without uncertainty parameters.	Generative AI assistant suggesting empathetic tone for email drafting.	Visible risk tags shared across roles without student portal access.	Enterprise SSO, role-gated, no student entry.	Corporate SaaS, blue/gray palette, colored status badges.	WCAG 2.1 AA contrast; AI panel lacks ARIA live regions.
EAB Navigate360	Course Instructors, Academic Advisors, Peer Tutors, Students.	Concern flags, positive Kudos badges, and referral case tracking.	Tabbed dashboard views with structured sidebar navigation.	User-triggered flags rather than predictive algorithms.	Positive Kudos badges balanced with potentially punitive flag notices.	Closed-loop case updates with role-based referral permissions.	SSO with role-based access; no standalone entry.	Clean enterprise card UI, red/green traffic-light semantics.	WCAG AA contrast; mobile icon grid crowded.
Salesforce Education Cloud	University Administrators, Career Directors, Student Success Teams.	Student 360 profile management integrated across departments.	Multi-tab enterprise record view with vertical sidebar navigation.	Activity logging and history without predictive confidence bounds.	Formal administrative messaging tools.	Centralized interaction logs without simple discreet student help channel.	Enterprise SSO with granular permissions.	Professional enterprise, dense layout, Lightning Design System.	High desktop compliance; mobile unoptimized; ARIA gaps.
Proposed Solution ★	Academic Directors, Students, Peer Tutors.	Early risk detection with empathetic outreach, non-stigmatizing tags, and high privacy.	Responsive bottom tab bar for mobile students; clean left navigation for directors.	Qualitative wording ("3-week trend", "incomplete data"); NO numerical indexes or traffic lights.	Predefined empathetic templates focused on scheduling check-ins without disciplinary tone.	Discreet self-request for tutoring; no public risk labels or third-party exposure.	Low-friction, student-side, mobile-first onboarding.	Neutral contextual text badges; NO traffic-light semantics.	Mobile-first approach; ARIA live regions for dynamic suggestions.

Key Findings

What the benchmark reveals for CIMA

- Civitas: connect academic signals to human-reviewed, contextual support.
- Navigate360: a discreet request mechanism already exists; differentiate CIMA through language and disclosure.
- Salesforce: borrow case status and role boundaries without duplicating enterprise-level complexity.
- Across platforms: distinguish observed functionality from inferred usability and untested accessibility.

Design Decisions

Adopt / adapt / avoid

Adopt	Adapt	Avoid
Referral follow-up	Status without sensitive details	Public risk categorization
Role-based access	Minimum necessary fields	Default broad visibility
Student help request	Non-judgmental entry point	Punitive automatic messages
Academic trend display	State data sources and gaps	Unqualified risk certainty

Application to CIMA

Primary flow: academic director

- Review contextual academic signals and incomplete data.
- Check the student's situation before acting.
- Choose and edit a supportive outreach template.
- Record that contact occurred without broad disclosure.

Application to CIMA

Secondary flow: student

- Access a personal view without public risk classification.
- Read understandable academic progress information.
- Request academic support through a private entry point.
- Receive confirmation and follow-up information.

Application to CIMA

Secondary flow: peer tutor

- Receive a subject-specific tutoring assignment.
- Access only necessary coordination information.
- Agree on session details with the student.
- Confirm completion without seeing unrelated risk history.
